COLLEGE-TO-SCHOOL REPORT

Introduction

This is the second year of the Board of Higher Education's *College-to-School Report*, a system-wide initiative to provide high schools and colleges with information on the performance of Massachusetts high school graduates enrolled in Massachusetts public postsecondary institutions. The report is designed to help improve communication between public colleges and high schools in Massachusetts by providing several indicators of how students perform and persist in college.

The *College-to-School Report* provides administrators and faculty in both high schools and colleges with data on the performance of high school graduates after their first year of enrollment at a public higher education institution. The report contains useful information on the number of 1995 high school graduates who required remedial course work in English (writing and/or reading) or math, the percentage of students enrolled in remedial courses, the percentage of students enrolled in remedial courses who returned in the Fall 1996, the overall return rate of students, and the average number of credits earned by returning students in the first year.

We recommend that the information in this report not be used to compare high schools with each other due to the small number of students from some high schools, and the fact that the report does not include those students who attended out-of-state institutions and private institutions. In addition, the database currently does not contain students' high school grade point averages (GPA). Without this information, we cannot determine whether weaker performing students from some high schools are being compared with stronger performing students from another.

The *College-to-School Report* is based on data submitted by all 28 Massachusetts public higher education institutions, with a total enrollment of 25,613 freshmen in the fall of 1995. Approximately 13,213 students (or 52%) graduated from a Massachusetts high school in June, 1995. This report is based on the performance of these students.

COLLEGE-TO-SCHOOL REPORT

Report Overview

This three-part report includes the following data, compiled by institution and aggregated by segment, for those students who graduated from Massachusetts high schools in June, 1995 and enrolled as freshmen in 28 Massachusetts community colleges, state colleges and UMASS in the Fall 1995:

- number of full-time students (taking 12 or more credits) enrolled as freshmen in Fall 1995
- number and percent of students who returned in Fall 1996
- number and percent of students enrolled in remedial English and mathematics courses in Fall 1995
- number and percent of remedial students who returned in Fall 1996
- average number and range of credits earned by returning students
- average and range of first year grade point average (GPA) earned by returning students

Part I, "*Segment Summaries*," is a system-wide summary that provides aggregate numbers and percentages of full-time students enrolled in remedial English and Math courses. It also provides the average and range of student GPA's and credits earned by returning students in each higher education institution and segment (university, state colleges and community colleges).

Part II, *"Summary of 1995 High School Graduates' Performance in Massachusetts Public Higher Education,"* shows how 1995 high school graduates performed in their first year of enrollment at Massachusetts public higher education institutions. Data are reported only for high schools that had five or more students who returned in Fall 1996 to a university, state college or community college campus.

Part III, *"College to College Report,"* examines those full-time freshmen students who transferred from one MA public higher education institution to another some time between the Fall of 1995 and the Fall of 1996. The report does not track transfers to out-of-state or private institutions, and therefore should be viewed as only partial data.

COLLEGE-TO-SCHOOL REPORT

Changes from the Second Annual Report compared with the Pilot Year

The first year of the *College-to-School Report* was a pilot year and all public higher education institutions did not participate in the study. This year, all 28 campuses are represented and provide a wider perspective on the relationship between Massachusetts high schools and post-secondary institutions. Private high schools were not included last year, but are represented in this year's report.

Due to the feedback received from public higher education institutions and high schools, several changes were made to the report this year. The cohorts examined on the college level are now based on full-time students (enrolled with 12 credits or more) only. For community college students, the cohorts were adjusted for those students enrolled in one-year certificate programs who completed their programs. In addition, information on remedial coursework at all Massachusetts public higher education institutions has been updated.

Finally, *Part III: The College-to-College Report*, was added to account for those students who transferred from one Massachusetts public higher education institution to another between Fall 1995 and Fall 1996, to illustrate their patterns of transfer.

Future Plans

Next year's report will provide information about 1996 high school graduates entering public higher education in Fall 1996 and their performance through Fall 1997. Beginning with the 1997 high school graduates, future reports will be able to compare a student's high school and college GPA at four-year institutions.

College-to-School reporting is designed to promote discussion about the academic performance and persistence of Massachusetts high school graduates in public higher education. Future reports will be further refined over the course of the next year as reactions from high schools and campuses are received. Ultimately, increased direct communication between college and high school faculty should clarify the relationship between the learning gained in high school and success in college, and lead to improved student academic preparation and performance.

COLLEGE-TO-SCHOOL REPORT

Highlights Regarding Student Performance at the University

- **Approximately 10 percent of the full-time University students in the report were enrolled in a remedial English course and 15 percent were enrolled in a remedial math course in Fall 1995.**

- **Of the students enrolled in remedial courses, 72 percent of the students in English remedial courses returned in 1996, and 74 percent of the students in remedial math courses returned in 1996. The overall return rate for students in the 1995 University cohort was 86 percent.**

- **Returning full-time University students in the 1995 cohort earned an average 2.6 grade point average (GPA).**

- **Returning University students in the report earned an average 26.6 accumulated credits by the Fall 1996.**

- **Of the University students who did not return in the Fall 1996, 8 percent transferred to another UMass institution, 10 percent transferred to a Massachusetts state college and 19 percent transferred to a Massachusetts community college.**

Highlights Regarding Student Performance at the State Colleges

- Approximately 12 percent of the full-time state college students in the report were enrolled in a remedial English course and 14 percent were enrolled in a remedial math course in Fall 1995.

- Of the students enrolled in remedial courses, 63 percent of the students in English remedial courses returned in 1996, and 67 percent of the students in remedial math courses returned in 1996. The overall return rate for students in the 1995 state college cohort was 80 percent.

- Returning full-time state college students in the 1995 cohort earned an average 2.4 GPA.

- State college students in the report earned an average of 26.8 accumulated credits by the Fall of 1996.

- Of the state college students who did not return in the Fall 1996, 5 percent transferred to a UMass institution, 7 percent to another Massachusetts state college, and 23 percent to a Massachusetts community college.

COLLEGE-TO-SCHOOL REPORT

Highlights Regarding Student Performance at the Community Colleges

- **Approximately 37 percent of the full-time freshmen at community colleges were enrolled in a remedial English course and 41 percent were enrolled in a remedial math course in Fall 1995.**

- **Of the students enrolled in remedial courses, 55 percent of the students in English remedial courses returned in 1996, and 52 percent of the students in remedial math courses returned in 1996. The overall return rate for community college students in the 1995 cohort was 62 percent.**

- **Returning full-time community college students in the 1995 cohort earned an average 2.4 GPA.**

- **Community college students in the 1995 cohort earned an average of 22.4 credits by the Fall of 1996.**

- **Of the community college students who did not return in the Fall 1996, 4 percent transferred to another Massachusetts community college, 6 percent to a Massachusetts state college and 4 percent to a UMass institution.**

NOTE: To protect student confidentiality, information is only reported for a high school when five (5) or more students at the university, state college or community college level returned in Fall 1996. Each high school listed on this summary will receive an individual high school performance report containing more detailed information.

Students are placed in remedial courses based upon the results of a placement test; these tests are not uniform across the system.

· Returning student numbers also reflect those students who transferred to another MA public higher education institution or left the institution after completing a certificate.

NOTE: To protect student confidentiality, information is only reported for a high school when five (5) or more students at the university, state college or community college level returned in Fall 1996. Each high school listed on this summary will receive an individual high school performance report containing more detailed information.

Students are placed in remedial courses based upon the results of a placement test; these tests are not uniform across the system.

· Returning student numbers also reflect those students who transferred to another MA public higher education institution or left the institution after completing a certificate.

NOTE: To protect student confidentiality, information is only reported for a high school when five (5) or more students at the university, state college or community college level returned in Fall 1996. Each high school listed on this summary will receive an individual high school performance report containing more detailed information.

Students are placed in remedial courses based upon the results of a placement test; these tests are not uniform across the system.

** Returning student numbers also reflect those students who transferred to another MA public higher education institution or left the institution after completing a certificate.*
